## Four-Play

By Helen Howes for MAQ

Cut four 6-inch squares in four different fabrics.

For the best results, you need four 4-patch blocks with all different fabrics each time. So, 16 fabrics

Make a 4-patch block, using 1/4 inch seams and sewing the fabrics right sides together - sew two pairs, press the seams in opposite directions, match the seam in the middle nesting the seams nicely and sew again...

**PRESS!**

Lay your block on your mat and cut two inches from the seam line above and to the right as shown. Two cuts only!

Shuffle the pieces with three more blocks and sew back together...

Re-arrange as shown and sew the pieces together again and press

Blocks can be trimmed if not all precisely the same size. Rotate the blocks so that the seams do not match when you sew them together, this is intentional...
